

Project: implemented under the Operational Programme Development of Knowledge Education, Priority IV - Social innovation and transnational cooperation

Subject: increasing the number or range of social services provided by social economy entities or increase the level of use of these services by public administrations

What kind of partner we are looking for: as part of a partnership project is permitted only with a partner from the European Union. To cooperate in the project are looking for an organization or institution that has a model or acts based on the proven method of working with actors of the social economy, thanks to which these entities are ready to take over and implement social services.

We are concerned about the use of foreign experience by adapting the solutions used in the other country and their transfer to the Polish ground or by creating in collaboration with a foreign partner new methods that are available for use in other realities. Their implementation in Poland, will contribute to improving the situation in the area indicated above topic.

The other partners in the project:

1. City of Slupsk
2. Partner with the private sector
3. Partner with non-governmental sector

The indicative budget of the project: about 750.000,00 euro

Project duration: start date of the first quarter 2016, turnaround time - no longer than 30 months

Preliminary description of the project: The project envisages development of a system / package of measures / support model for social economy entities by local government units to prepare them to adopt and implement a public service whose provision is under the responsibility of local government units own.

As a social economy entities define non-governmental organizations conducting economic activity or paid, social cooperatives, cooperative corporation, Centres for Social Integration, Social Integration Clubs, Vocational Activity Establishments.
