

Young people from Catalonia's youth center are looking for a partnership to participate in a youth exchange about topics of youth and social interest

We address to you since we are interested in your new Exchange Project. We are a group formed by young students from Badalona (Barcelona), between the ages of 15 and 21. Our group is formed by 15/20 collaborators that not only have different ages; we also come from different social realities, cultures and have different worries. These facts, let us consider different points of view and enrich our group and the acts we do.

OUR GROUP

Our group was set up through the PIDCES Project (Program to inform and create activities in high schools) from the Youth Town Hall's Department. This program works informing and creating activities for students in Public High Schools about topics young people are interested in. In addition, in order to encourage youth participation, a work group was formed with volunteers. As a group, we accomplish different acts: we cooperate with sociocultural workers, as in the "student's workday", an event that brings together students from different Badalona's Public High Schools to work out interesting topics for these young students. We also collaborate in neighborhood associative activities and broadcasting projects for the different youth centers our city has.

We would like to have the privilege to participate in the experience of an Erasmus+ so we can meet new cultures and other young people with our same worries and work them out. We especially would like to develop topics as social integration, communication, human rights, antidiscrimination and art as an expression and change tool for young people.

Finally, it should be noted that it's an opportunity to be in another country, discover their traditions and know how they experience and solve this issues in a different place from ours.

We would like to have the exchange for one week, between September 2016 and October 2016.

Thank you for your attention and your time. We are looking forward to hear from you.
Yours sincerely,

PIDCES collaborators.
